Technical Skills

Languages: JavaScript | HTML | CSS | MQL | familiarity with Python

Frameworks and Tools: React | Express | MongoDB | SASS | Git | Linux | Axios | Bcrypt | JWT | Passport

My Journey

Self-taught Web Developer through The Odin Project (TOP). TOP is a Full-Stack Web Development “bootcamp”. Being the dedicated self-starter that I am, I quit everything that wasn’t my full time job, or Development, I finished TOP in 9 months through diligent self-study. My ultimate goal is to grow into the best Full Stack Web Developer I can be. After completing TOP, I have continued to create new and better projects to further my skills and grow my development ability.

Education

- Studied Computer Science at Butler Community College From 2018-2020

Work Experience

Kmart / Sears SHC

Stockman/Cashier/Customer Service

Wichita, Kansas

07/2013 - 09/2015

- Accountable for stocking merchandise in store. Receive and distribute inventory.
- As a cashier, greet customers, and handle transactions.

Walmart

Fresh Associate

Derby, Kansas

08/2016 - Present

- Accountable for stocking fresh merchandise in store. Receive and distribute inventory.
- Ensure all products are fresh and meet quality standards.
- Order products when necessary, set featured items, work with the associates and management
- to make sure everything is running as effectively and efficiently as possible.

Awards

- Achieved 3rd Place in Hacks for Humanity Hackathon 2022.

Projects

blogApi

<https://github.com/Joey-Red/blogApi/>

- Created a full stack blogging app using **MongoDB**, **Express/Node** and **React**, **Bcrypt** for password encryption, **JWT** for user verification.
- Admin/User functionalities accounted for, create, update, delete posts and comments.

The Watchlist

<https://github.com/Joey-Red/frontend-tw/>

- Developed using **React**, Typescript, Node/Express, Mongoddb. Bcrypt for password encryption.
- Includes searching, rating and adding movies to your list. Full CRUD ability on your personal list.

Where's Pikachu?

<https://github.com/Joey-Red/wheres-pikachu/>

- iSpy style game for Pokémon using **React** and **Firestore**.
- Works on mobile devices.
- Includes conditional based global high score system.

Members Only

<https://github.com/Joey-Red/members-only/>

- Launched a story telling app using **React**, **Express/Node**, **MongoDB**.
- Anyone can tell a story, but only verified members will be able to reveal the author of the posts. Enter the secret word and you will become a member.
- Implemented Bcrypt to encrypt passwords, and Passport for sessions.
