Frameworks and Tools: React | Express | MongoDB | SASS | Git | Linux | Axios | Bcrypt | JWT | Passport

My Journey

Self-taught Web Developer through The Odin Project (TOP). TOP is a Full-Stack Web Development "bootcamp". Being the dedicated self-starter that I am, I quit everything that wasn't my full time job, or Development, I finished TOP in 9 months through diligent self-study. My ultimate goal is to grow into the best Full Stack Web Developer I can be. After completing TOP, I have continued to create new and better projects to further my skills and grow my development ability.

Education

- Studied CS at Butler Community College From 2018-2020

Work Experience

Kmart / Sears SHC   Wichita, Kansas
Stockman/Cashier/Customer Service   07/2013 - 09/2015
- Accountable for stocking merchandise in store. Receive and distribute inventory.
- As a cashier, greet customers, and handle transactions.

Walmart   Derby, Kansas
Fresh Associate   08/2016 - Present
- Accountable for stocking fresh merchandise in store. Receive and distribute inventory.
- Ensure all products are fresh and meet quality standards.
- Order products when necessary, set featured items, work with the associates and management to make sure everything is running as effectively and efficiently as possible.

Projects

blogApi   https://github.com/Joey-Red/blogApi/
- Created a full stack blogging app using **MongoDB, Express/Node** and **React**, **Bcrypt** for password encryption, **JWT** for user verification**.**
- Admin/User functionalities accounted for, create, update, delete posts and comments.

Website Clone (Reddit)   https://github.com/Joey-Red/website-clone/
- Developed using **React** and **Firebase, DraftJS** and **Google Authenticator**.
- Includes subreddit communities, add/update/delete posts, comments, likes, dislikes.

Where's Pikachu?   https://github.com/Joey-Red/wheres-pikachu/
- iSpy style game for Pokémon using **React** and **Firebase**.
- Works on mobile devices.
- Includes conditional based global high score system.

Members Only   https://github.com/Joey-Red/members-only/
- Launched a story telling app using **React, Express/Node**, **MongoDB**.
- Anyone can tell a story, but only verified members will be able to reveal the author of the posts. Enter the secret word and you will become a member.
- Implemented Bcrypt to encrypt passwords, and Passport for sessions.
